

# HYS-(3-6)LV-EUG1

## Hybrid Inverter (Single-phase)

### Key Features

#### Enhanced Power Management

Features intelligent export limitation, double MPPT trackers with up to 14A current, and a DC/AC ratio of 150% for optimal energy output.

#### Compact and Lightweight Design

Ultralight design for easy installation and space-saving, ideal for diverse applications.

#### Flexible and Reliable Control

UPS-level switching (<10 ms) with built-in dry contact for earth fault alarm, load control, or generator control.

#### Scalable and Versatile

Compatible with multiple batteries and supports up to 10 parallel inverters, providing more options for system expansion.
